

Armandas Genys

Junior Frontend Developer

👤 About me (short)

I Enjoy working on projects, learning new technologies, taking on challenges in a team environment or by myself. I am more of a self learner so I am always up for a challenge.

📁 Employment History

Self Made Projects, Vilnius

May 2023 — Present

- I have dedicated a significant amount of time honing my skills after I finished my courses. One of my notable achievements is the creation of a responsive shopping website using a tech stack that includes **React JS**, **Tailwind CSS** and **Firebase** for backend, demonstrating proficiency in: **HTML**, **CSS** and **JavaScript**. It is located with the rest of my projects at <https://armandasgenys.com/>
- After and while doing my first website project I took courses and tips from several sources - documentations, youtube, udemy as I did face challenges that had to be overcome such as: *how to structure my code, how to properly use a DB, what are the best practices in general, managing global states and states in general, avoid overly complex functions or break them into smaller ones, dealing with async code, managing element changes when making the website responsive, dealing with CRUD and etc...*
- After I finished my website project I started to move ahead and also learn **TypeScript**, **Node JS**, **Next JS** to build a new project and to be able to write my own backend as the courses that I previously finished at *CodeAcademy*, *udemy* provided me with knowledge mostly at the frontend field while I also want to be able to properly read and understand the backend or at least to be able to write it at the level where I could deploy my own website.

Customer Care Specialist at Girtoka Logistics, Vilnius

February 2019 — October 2022

Communicating in a team environment. Solving problems, **Spoken English** and **Written English** usage while communicating with clients. General knowledge about the transportation industry.

🎓 Education

Certificate, CodeAcademy, Vilnius

January 2023 — May 2023

Throughout this journey in becoming a Front-End Developer - I have acquired expertise in a wide range of topics: **HTML5**, **CSS3**, **JavaScript** and **React JS** - alongside other valuable tools such as: **Bootstrap**, **GIT**, **Styled Components**, **SASS** that are sure to prove indispensable in my future endeavors. What's most important is that my passion for
